

Contribution of each member to the project
Project name: Impact of Game Addiction,

Group Members:

Fahim Sadik (213014027)

Samiul Islam Ramim (213014020)

Abdur Rahman (213014008)

First of all, we distributed our work equally and helped each other with their work from time to time. Because of the project outline, we were given tasks one after another, so it was easier to work together and effectively.

Topic name	Contribution
Research	Firstly, we were tasked with finding a topic and researching it. So we came up with different ideas, like Samiul Islam Ramim came up with Road Accident and coronavirus vaccination, then Abdur Rahman came up with the idea of Heart failure percentage, and Fahim Sadik came up with the impacts of game addiction. So after our advisor chose our topic as the impact of game addiction, we started researching that and started collecting journals.
Literature Review	After selecting the topic, we were assigned to review 15 articles. We each reviewed 5 journals and wrote our reviews. In the end, we did some extras and we came up with 19 literature reviews. Fahim Sadik is smooth in English. We basically corrected all our reviews by him, and after that, he submitted them.
Making Question Set	This part was basically under the journals, which were under Abdur Rahman. So he basically started doing notes of the questions and we slightly changed them with suitable words and grammar.
Collect Data	Making questions and with them making five google forms for five different Universities. After that, our friends in those five different universities, we contacted them and provided them with the links and told them to share that.
Data Analysis based on Excel data	Data analysis and pre-processing of the accrued data were carried out mainly by

	Ramim and he got help from Fahim.
Coding	The coding part was completely done by Samiul Islam Ramim. At times Fahim Sadik and Abdur Rahman helped him for finding variables and python codes for the different algorithms.
Report and papers	The report part was done by Fahim Sadik with the provided details from Ramim and Abdur Rahman.

In the end, we agree with each other that we shared our time equally and provided the same energy and effort for this project.

Thank you, sir.
